FRESH ONLY · DAILY TECHNOLOGY REPORT

Today's New Trends

June 20, 2026 (Saturday)

A FEW SIPS

This report includes the trends that stood out today for the first time, without repeating what we have shared in recent days.

10 HIGHLIGHTS · ~15 MIN READ

4 GitHub Trending

5 Hacker News

1 HuggingFace · Daily Models

01 palmier-io/palmier-pro

Palmier Pro was developed as a video editor that runs on the macOS operating system and offers artificial intelligence-supported editing tools. This application, written in Swift language, aims to combine artificial intelligence-based workflows with local system performance.

Swift · ★ 2,134 · +756 today <https://github.com/palmier-io/palmier-pro>

02 koala73/worldmonitor

Worldmonitor offers a real-time global intelligence dashboard that combines AI-powered news compilation and geopolitical monitoring features in a single interface. This tool, which provides infrastructure monitoring and situational awareness, facilitates analysis processes by visualizing complex data flows.

TypeScript · ★ 57,469 · +156 today <https://github.com/koala73/worldmonitor>

03 aishwaryanr/awesome-generative-ai-guide

The awesome-generative-ai-guide repository collects current research, interview resources and notebooks in the field of generative artificial intelligence (generative AI) in one place. This resource serves as a comprehensive learning and reference center for developers and researchers.

HTML · ★ 27,722 · +107 today <https://github.com/aishwaryanr/awesome-generative-ai-guide>

04 BuilderIO/agent-native

Developed by BuilderIO, agent-native is a TypeScript framework focused on creating agent-native applications for artificial intelligence agents. It allows developers to integrate agent-based workflows directly into the application architecture.

TypeScript · ★ 1,138 · +147 today <https://github.com/BuilderIO/agent-native>

01 Hyundai buys Boston Dynamics

Hyundai increased its control in the field of robotics by purchasing all of its shares in Boston Dynamics from SoftBank for \$ 325 million. This move strengthens the automotive manufacturer's strategic investments in autonomous mobility and humanoid robot technologies.

03 Project Valhalla, Explained: How a Decade of Work Arrives in JDK 28

Project Valhalla aims to increase performance by providing value types and improved memory layout support on the Java Virtual Machine (JVM). This work makes memory usage more efficient by optimizing data locality in object-oriented programming.

586 points · 360 comments

04 There are no instances in ATProto

Unlike traditional social networks, the ATProto protocol uses a user-oriented data structure instead of central servers. This architecture offers a portability feature that allows users to move their accounts between different platforms.

video editor

Software that cuts and combines image and audio files into a watchable video.

global intelligence dashboard

Management panel that allows monitoring the situation by collecting data from different parts of the world on a single screen.

situational awareness

It is the ability of a system to instantly perceive what is happening around it and correctly comprehend the current situation.

generative AI

Technology that can produce new content such as text, visuals or sound from scratch based on the information it has learned.

notebooks

Interactive work environments where you can take notes while writing code and see the results instantly.

agent-native applications

Applications specially designed for artificial intelligence assistants that can make decisions on behalf of the user and carry out transactions on their own.

framework

The basic structure that provides a set of ready-made tools and rules that makes your job easier when developing software.
